What was it that inspired ASKINOLOGY and the range of treatments you offer?

I had a vision for a completely new way of offering the best skin care and treatments in a beautifully designed space without the stigma or intimidation of a traditional medical clinic. We wanted ASKINOLOGY be a place our clients looked forward to visiting and would continue to visit for a long time.

ASKINOLOGY is dedicated to improving skin health for busy people who don't have the time for long periods of downtime within their day to day lives. Our goal is to offer individuals quick and easy access to a wide range of treatments in one place where they do not have to

Why did you decide to introduce the 3JUVE into your clinic?

At ASKINOLOGY we were looking for a scientifically proven device that could provide 3 in-demand anti-aging technologies all in one device, whilst also carrying out these treatments effectively for our clients: this is why we decided to choose the 3JUVE.

Due to the 3JUVE being a certified medical device we had great confidence that it would tackle discoloration, fine lines, and wrinkles for all of our clients to great effect. This was then confirmed when we decided to trial the device and were blown away with the clinical results we witnessed in such a short space of time. The 3JUVE is small and compact so fits perfectly into our clinic. Additionally, the device was so easy to use and train our practitioners on which gave them the confidence to dive straight into treatments and start making the most of all the 3JUVE's amazing features.

Are you happy with the clinical results you see?

In the short time that we have been using the 3JUVE the clinical results we have achieved have been outstanding, especially with the 585 IPL for broken veins and rosacea. The Er: YAG resurface handpiece has also been proving beneficial as it's not too aggressive for our clients and they can remain comfortable whilst treatments are being carried out. Furthermore, for such impressive results we are blown away by how quick the actual treatments are which is maximising our profit-making potential through the 3JUVE treatments. Overall, we are delighted with our results so far and even more delighted with how happy our patients have been with their results.

Why did you choose Lynton as your aesthetic technology supplier?

Lynton are a company with a strong history and a high reputation. Since their start at the University of Manchester over 25 years ago, they have held a strong position in the market as a trustworthy company to work with, their technology works, and their team is fantastic to work with.
