Heidi Smith - Clinic Director

BLANK CANVAS LASERS

Blank Canvas Lasers was established in 2014 and has become a popular choice for laser treatments with many local tattooists trusting them with their clients. Heidi is fully trained and clinically supported by Lynton Lasers and takes a great deal of pride in her work. Every client is important, and each appointment is tailored to individual needs.

What was it that inspired the range of treatments you offer?

I live in Essex and originally intended just to do tattoo removal as tattoos are extremely popular where I live. I had been made redundant and wanted a complete career change. Running my own laser clinic was an exciting and very possible prospect!

What Lynton equipment do you use at your clinic?

I have a multi-platform LUMINA® Laser and IPL system so I can offer the full range of laser and IPL treatments.

And are you happy with the clinical results you see?

My results are fantastic as you can see from the extensive and endless supply of before and after images that I use in my marketing!

Why did you choose Lynton as your aesthetic technology supplier?

I wanted a British manufacturer, quality training, ongoing support, servicing and quality results. Lynton was one of several companies I spent 6 months researching and they were head and shoulders above the others I spoke to.

What advice would you give to a clinic considering Laser or IPL?

Get the best quality equipment you can afford and please don't be tempted to buy a bargain! Make sure every member of staff is trained comprehensively because you'll only get the best from your equipment if it's used properly.
