

In therapy

Following an intensive peel or laser treatment, Norabode Bio2 Light Therapy helps to immediately regenerate the skin. The newly launched machine uses light infusion in corresponding wavelengths to heal wounds, increase circulation, detoxify and calm complexions for more efficient skincare results. *Tel: 01775 722 243 E: enquiries@oxyjetuk.co.uk*

Perfectly tailored

NeoStrata's ProSystem Peels provide the clinically-proven skin rejuvenation benefits of alpha hydroxy acids in one complete system, allowing therapists to tailor skincare programmes to suit a multitude of skin concerns.

Feel the power

Making its industry debut at this month's Olympia Beauty, the new Lynton Excelight combines power, versatility and clinical efficacy to deliver its most

advanced IPL treatments to date. The British-made machine captures 20 years' expertise to offer hair removal and skin rejuvenation while targeting acne, sun damage, pigmentation, rosacea and more. Key advancements include maximum client safety and comfort as well as flexible treatment spot size. *Tel: 01477 536 977 Lynton.co.uk*

First choice

Ecolite is at the forefront of aesthetic technology with its globally successful Ecolite V9 IPL and newly launched Ecolite IR Diode Laser. As Ecolite specialises in compact technology, these two very affordable systems deliver proven results without the heavy price tag of other machines on the market. And with the promise of total reliability and exceptional lamp-life, they come with no service contracts for the ultimate IPL and laser solutions. *From £9,995 + VAT; Tel: 020 998 6657 E: info@ecoliteipl.com Ecoliteipl.com*

Damage control

Australian heavyweight Novita is an expert in caring for pigmented and sun damaged skin. Its range of crystal and diamond paramedical grade microdermabrasion equipment and skin peels help reverse fine lines, sun damage and pigmentation to create younger looking complexions. Standout treatment the Cerasome

Oxygen Facial system works by delivering a fine stream of oxygen-charged serums into the epidermis to repair and rejuvenate the skin. *Tel: 01635 749 749*
