

Elaine Frances - Clinic Owner

We recently caught up with one of our loyal customers, Elaine Frances Clinical Aesthetic Ltd. They have been a customer of Lynton for 16 years! They specialise in Intense Pulse Light treatments (IPL Laser), as well as treatments involving other complementary technologies. The treatments range from hair removal, pigmentation removal to microdermabrasion, skin peels and other types of IPL skin rejuvenation. They deliver safe and effective treatments in a friendly and professional environment.

What was it that inspired Elaine Frances Clinical Aesthetics Ltd?

After 30 years of treating people's skin, as a therapist, I knew I needed to find a more clinical alternative to electrical facials which brought me to Lynton and purchasing a LUMINA® laser.

What Lynton equipment do you use at your clinic?

We have a LUMINA®, Luminette, Long Pulsed Nd:YAG, Q-Switch Laser, IPL and Fractional.

Are you happy with the clinical results you see?

Yes, and with the new fractional resurface laser coming on board earlier this year, we have now the ability to offer oral solutions for skin disorders, maturity and scars.

Why did you choose Lynton as your aesthetic technology supplier?

Lynton has a good reputation, good quality equipment, excellent service and importantly they are British manufactured meaning a prompt second to none repair and service contract.

What advice would you give to a new start-up clinic?

Know your product, research and ask other clinics supporting the laser and IPL that you are considering. And importantly consider the after-sales and service that this manufacturer provides.
