Freyja Medical Clinic Team

The core team is made up of Dr Keli Thorsteinsson, Dr James Dean, Sister Nia Hughes and our lead practice administrator, Catherine Jones. They are all 100% committed to excellence in patient and client care. The doctors split their time between NHS and private dermatology, aesthetic medicine, and skin surgery. Dr Dean also leads the in-house private GP practice team.

### What was it that inspired Freyja Medical Clinic?

Our move into the aesthetics industry really was a natural progression from the many years of work in NHS Dermatology. We were able to take the very best aspects of our experience in medicine and apply them to our aesthetic work to provide a truly expert approach.

### What Lynton equipment do you use at your clinics?

At Freyja Medical we use the amazing Lynton EXCELIGHT® IPL machine. It is a fantastic compact workhorse that does every job we ask of it and more.

### And are you happy with the clinical results you see?

The results we achieve with this device are truly outstanding. When we purchased it, we were a little unsure due to the compact nature, but the results speak for themselves. We have had numerous clients tell us how much more effective these treatments are than in other clinics where they use different manufacturers devices. We really couldn't do without it!

### Why did you choose Lynton as your aesthetic technology supplier?

It's not just all the awards and accolades that Lynton has achieved over the years, nor is it all down to the superb and reliable devices they manufacture. Truth be told it is all of this PLUS the fantastic support, education and professional but friendly attitude of everyone we have come into contact with there.

### What advice would you give to a clinic considering laser or IPL?

If you are considering any laser or IPL devices, then Lynton should be your top choice to go to first. Their team is based in the UK and the devices are manufactured here to the highest standards. I know that when we buy any of these devices in the future, they will be Lynton.
