What was it that inspired the Laser Clinic South Yorkshire?

I was inspired by industry changes and the growing awareness and desire for health and wellbeing treatments. Alongside having the knowledge to positively help change the parts of people that raises their sense of self-esteem. Treatments such as skin rejuvenation and hair removal are very big for people's self-esteem and self-awareness.

What Lynton equipment do you use at your clinic?

I have the multi-functional EXCELIGHT® IPL system for hair removal and skin treatments.

And are you happy with the clinical results you see?

Yes, I have treated many people with acne, and they have been very successful treatments. Seeing the results, I am even more keen to promote this option further.

Why did you choose Lynton as your aesthetic technology supplier?

Reputation, being the No.1 in the UK, the support, the professionalism. What I didn't notice at the time was that it's almost like being part of a family with Lynton and I know if anything goes wrong, I have got someone there.

What advice would you give to a clinic considering laser or IPL?

If you buy the wrong equipment you run into all sorts of problems and I think the industry does have a bad name just because there is a lot of bad equipment out there. Do lots of research into system options before making a decision.
