### **What was it that inspired your aesthetic clinic?**

I wanted to ensure my clients had all their expectations met when they came to the salon. I wanted to offer a wide range of services including aesthetic facials to help clients look and feel amazing.

### **What Lynton equipment do you use at your clinics?**

We have the LUMINA<sup>®</sup>, this was the only choice for us.

### **Are you happy with the clinical results you see?**

Yes, definitely from pigmentation to tattoo removal, the results are amazing.

### **Why did you choose Lynton as your aesthetic technology supplier?**

After 18 months of research we decided on Lynton because of the reliability of the machine and the results of the treatments. Also being a local company and a British company was a big plus for us. The training provided was very informative.

### **What advice would you give to a clinic considering laser or IPL?**

Be committed and maintain a high refusal rate to those patients that are unsuitable for treatments to maintain a perfect reputation.
