What was it that inspired Clinica Fiore Ltd?

I felt in the industry you either had expensive treatments with good service or cheap treatments with bad service. I wanted to provide affordable treatments with fantastic service so that everybody could benefit from aesthetic treatments regardless of budget. My moto being 'Beauty is for Everybody'. I felt the need to provide affordable treatments without compromising on the quality which I believe is why we are still thriving in this economic climate and the reason behind our success.

What Lynton equipment do you use at your clinic?

We use the LUMINA® alongside the 585, 650, 650 Advanced, Long Pulsed Nd:YAG and Fractional Laser handpieces. We also have the Promax Lipo for skin tightening and body contouring.

And are you happy with the clinical results you see?

We couldn't wish for better results! The feedback from my 15 years plus experienced practitioners and our regular faithful client base over 9 years is great. As with any treatments the results will vary due to several factors but the training we had with Lynton is so extensive and knowledgeable that we are able to give the best consultations and this enables us to manage our clients expectations. Results are always great in our experience.

Why did you choose Lynton as your aesthetic technology supplier?

We have been working with Lynton Lasers for the past 9 years since Clinica Fiore opened its doors to the public. Lynton was my first choice due to the extensive medical studies behind their machines, and the amazing reputation within the industry. We have been so happy and we feel extremely looked after by the fantastic Lynton team.

What advice would you give to a clinic considering laser or IPL?

Do not waste your time looking somewhere else. Award-winning Lynton Lasers is the answer to all your laser hair removal and skin rejuvenation needs.
