Clinic Director - Rosy Boulton

## CRYSTAL ROSE

SKIN SPECIALIST

Rosy Boulton is a registered nurse with a real passion for skincare. "At Crystal Rose Skin Clinic we love to help you achieve beautiful, healthy and younger looking skin. We have a fabulous range of natural, minimally invasive, and chemical free skin care treatments here to help, all tailor made to suit your skin. I am thrilled to announce that Crystal Rose Skin Clinic is the first clinic in Suffolk to offer the fantastic 3JUVE Laser system by Lynton Lasers. The system is a real multi-tasker that tackles a multitude of skin concerns with 3 different laser and light technologies".

### What was it that inspired Crystal Rose Skin Clinic?

My inspiration came from my clinics strong ethos of using medical grade, tried and trusted non-surgical technologies that are backed up by robust research and enable you to give safe and effective results.

### What Lynton equipment do you use at your clinics?

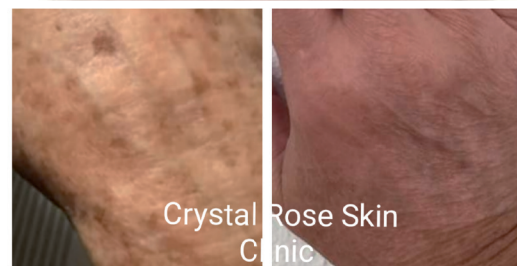

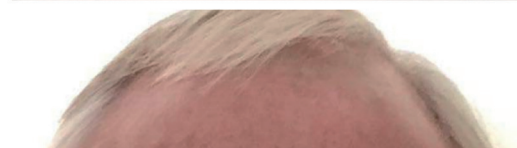

The 3JUVE® from Lynton Lasers was the missing piece of the jigsaw in my aesthetic clinic allowing me to offer a range of anti-ageing treatments with one system.

### And are you happy with the clinical results you see?

Since investing in the laser, clients have consistently seen excellent results increasing my client base.

### Why did you choose Lynton as your aesthetic technology supplier?

Being medical grade and British greatly impressed me along with Lynton's thorough training programme and ongoing support. I would have no hesitation in recommending Lynton Lasers to any aesthetic business.

### What advice would you give to a clinic considering laser or IPL?

The advice I would give would be firstly do your research into the IPL and Laser equipment and the company. Then try out various IPL and Lasers yourself. Do not be afraid to contact clinics that have the device you're interested in and ask their opinion. It is important to consider a company that offer after sales support and training before you invest.
