What was it that inspired Mode Clinic and the range of treatments you offer?

What inspired me to use Lynton is the fact that the Lynton's LUMINA® IPL and Laser system allows me to offer a wide range of treatments, using just the one machine. Also what was very much of a draw to Lynton in the first place is that they offer medical devices that deliver medical standard results, which ensures client satisfaction.

What made you decide on the LUMINA® multi-application platform?

The system delivers non-surgical cosmetic treatments, such as pigment removal, hair removal, skin rejuvenation, tattoo removal and acne. It's a multi-housing medical-grade piece of equipment with proven results and I have used it for 11 years. .

And are you happy with the clinical results you see?

We are incredibly happy with the clinical results as they are exceptional time and time again, with clients continuing to refer friends and family due to the results.

Why did you choose Lynton as your aesthetic technology supplier?

I did a year of research before I decided to choose Lynton. We had various demonstrations from other companies, and also experienced numerous treatments, and Lynton always came out on top for results and with how professional they were to deal with. Their equipment has always been far superior to any others, which is why we've stuck with them for so many years.

What advice would you give to a clinic considering laser or IPL?

Do your research! Look for a company with backup that isn't just concerned about selling a piece of equipment. Make sure they have after sales advice available and are able to come to your clinic should you need any engineer assistance. You also need someone on hand to ring up for help if you have questions about a treatment. With Lynton I have had so much support, and so much backup from them. Where possible, also buy British.
