lynton.co.uk

“Lynton has an established reputation in the UK, with high-quality, up-to-date equipment. Customer care and training are excellent.”

Professor Rhoda MacKenzie

What made you choose the EPN Pen?

“I chose the EPN Pen as it is the first Microneedling Pen to feature Electroporation Technology. It seemed a natural progression from the other pens I have been using over the last few years. I use the EPN to treat scarring, lines and wrinkles and pigmentation. I am impressed by the collagen induction results – with less downtime than standard Microneedling.”

“My patients can feel the difference during treatments and comment on the improvement afterwards. They are happy to pay more for EPN Pen treatment compared to standard Microneedling treatment.”
